Mecanix SAL  
Company Profile

# About Us

Mecanix is a manufacturing Lebanese company established in 1978, its head quarter is located in Beirut district 3 km from the sea port and 6 km from Beirut Airport. Mecanix is headed by the founder Mr. Assaad Obeid and the Managing Partners Mrs. Nuhad Khairallah, Mr. Michel Faysal, Mr. Dany Fayssal.

The area of Mecanix facilities is approx. 7.000 sqm, including workshops equipped with modern manufacturing machinery for steel structures, stainless steel works, conveying systems and handling equipments. Mecanix has also an important mechanical and electrical platform for assembly process.

The warehouse of Mecanix is providing more than 2000 items for spare parts & consumable parts ready to be dispatched to any country at any time. Since it was founded and through out the 40 years of work, Mecanix has been leading successfully the market of industrial refrigeration in the food & pharmaceutical application. Mecanix is executing also different industrial turnkey projects like pasteurized tomato paste plants, syrup tanks units, palm oil units & detergent factories.

The Sales department believes in shaping the change and growing up with the business by expanding its commercial network and acquiring new partners. We care about our clients concerns, thus Mecanix is applying the most advanced tools in order to handle with high efficiency all projects including the complete turnkey projects for complete lines of production.

The Engineering Department of Mecanix is well known in proposing innovative solutions and offering superior concepts & designs for different turn key projects such as powder detergent plants, refrigerated transportation, Juice Lines and food processing.

Our maintenance team provides: Maintenance, electromechanical maintenance and preventive maintenance contracts for refrigeration systems, HV AC and electromechanical machines.

Our core principle remains dedicated to the Service department in order to enhance our clients' satisfaction supported by 80 technicians and 23 service cars. Our technicians are implementing with great efficiency the most difficult projects in a sustainable and responsible way, they are reacting very fast to any service or maintenance calls in Lebanon and also in all countries where we are operating.

# Company Overview

Mecanix SAL, established in Lebanon, specializes in the manufacture of industrial machinery and equipment. With expertise spanning over 40 years, the company provides custom solutions across sectors like industrial automation, refrigeration, steel structures, and food processing systems. Headquartered in Hazmieh, Baabda, Mecanix SAL has grown to become a trusted partner for businesses seeking advanced automation and cooling technologies.

# Mission & Vision

Mecanix SAL is committed to enabling businesses to thrive locally and compete on a global scale. By delivering high-quality industrial solutions and comprehensive services, the company ensures optimal performance for its clients, fostering innovation and long-term partnerships.

# Core Values

- **Customer Focus:** Tailoring solutions to meet the specific needs of each client.
- **Quality Excellence:** Ensuring reliability and precision in all products and services.
